Phone: 0304-4580689

Professional Summary:

- Information Technology professional with years of extensive experience in the full software development life cycle (SDLC), specializing in developing and designing user interfaces for web and mobile applications using **React, TypeScript, JavaScript, jQuery, Angular, SFCC (Salesforce Commerce Cloud), SAP Hybris**, and modern frontend frameworks (**Bootstrap, Tailwind CSS, SASS/LESS**).
- Proven expertise in building scalable, high-performance UI components and single-page applications (SPA), delivering optimized and user-friendly experiences that support business growth.
- Strong experience in **WordPress customization, Elementor, premium themes**, and website builders like **Wix** and **Squarespace**.
- Hands-on experience with **CI/CD pipelines** (Jenkins), **GitLab**, **API testing** (Postman), and working in **Agile/Scrum** development environments.
- Skilled in **page performance optimization**, SEO best practices, and cross-browser compatibility.
- A collaborative team player with excellent communication skills, able to work closely with cross-functional teams and effectively engage with technical and non-technical stakeholders. Fast learner, adaptable to new tools and emerging technologies

Technical Skills:

- **Front-End Technologies:** React.js, TypeScript, JavaScript, jQuery, HTML5, CSS3, SCSS, Less, Bootstrap (3, 4, 5), Material UI, Tailwind CSS, Kendo UI, SFCC, SAP Hybris.
- **Version Control:** Git, Bitbucket, SVN
- **Build Tools:** Webpack, Gulp.js
- **Development Tools:** Visual Studio Code, Postman, FTP
- **CMS:** WordPress Theme Development, WordPress Customization
- **Project Management Tools:** Jira, Slack, Trello
- **Design Tools:** Figma, Adobe XD, Photoshop, Zeplin

Soft Skills:

- Strong communication and collaboration skills.
- Ability to work in Agile/Scrum environments.
- Quick learner and adaptable to new technologies.
- Problem-solving mindset.
- Team player with leadership qualities

Professional Experience:

Company: Royal Cyber PVT LTD

Oct 2021 - Present

Role: Senior Frontend Developer

Main Project:

Rent-A-Center — <https://www.rentacenter.com/>

Other Projects:

Acima — (<https://www.acima.com/en>),

Upbound— (<https://www.upbound.com/>)

Fletcher Building — (<https://www.fletcherbuilding.com/>)

Technologies: React.js, JavaScript, jQuery, HTML5, SCSS, LESS, Bootstrap, SAP Hybris, SFCC, GitLab, Jenkins, Postman,

Project Description: Rent-A-Center is a premier online platform offering flexible rental-purchase solutions for high-quality furniture, electronics, appliances, and computers. With a commitment to providing accessible ownership options, the platform empowers users to rent top-brand products through convenient payment plans, available both weekly and monthly, with the option to own them after the rental period.

Responsibilities:

- Developed responsive and high-performance user interfaces using **React.js**, **Bootstrap**, **Tailwind**, **HTML5**, **SCSS**, and **Less**.
- Built interactive UI components with JavaScript and jQuery, enhancing user engagement and seamless navigation.
- Designed scalable and consistent layouts, ensuring cross-browser and mobile compatibility.
- Integrated RESTful APIs with frontend components for real-time data updates and dynamic content rendering.
- Translated design mockups from **Figma** and **Adobe XD** into pixel-perfect, functional interfaces.
- Conducted cross-browser testing and performance optimization to maintain a smooth user experience.
- Followed best practices in **code optimization**, scalability, and maintainability.
- Worked across multiple projects and collaborated with cross-functional teams (backend, QA, product owners)
- Used **GitLab** for version control and **Jenkins CI/CD pipelines** for automated deployments.
- Followed Agile methodologies with participation in daily stand-ups, sprint planning, and reviews.

Company: TechAvant Pvt Ltd

Jul 2019 – Oct 2021

Role: Frontend Developer

Project Name: RentTango

URL: <https://renttango.com/>

Technologies: Angular8, HTML5, SCSS, Kendo UI, Visual Studio 2017, SQL Server 2016

Project Description:

RentTango is a leading real estate technology platform based in the United States and a strategic partner of Techavant. It empowers real estate companies to streamline their leasing operations with best-in-class technology and intuitive design. RentTango simplifies the entire rental process—from lead generation to lease signing—providing enhanced visibility, improved workflow efficiency, and robust reporting capabilities for property managers and leasing professionals.

Responsibilities:

- Built dynamic UI with Angular and Kendo UI.
- Customized components for client-specific needs.
- Integrated REST APIs and optimized performance.
- Collaborated with cross-functional teams.
- Improved code quality and responsiveness.
- Ensured cross-browser and mobile compatibility.
